# Get to Know Us

EMAD SABER

# Agenda

- Who am I?
- What I’m doing?
- What is the channel content?
- What is our mission & vision?
- How topics are selected?
- How is content being prepared?
- How can you go beyond your expectations?
- How can you help us?

# Who am I?

- Emad Saber Hamed
- Software Engineer with 12+ years of experience
- Graduated from Computer & Systems Engineering 2011
- Mainly working as .NET Full Stack Engineer
- Have basic experience on other stacks (PHP, Java, ...)
- Worked with many languages & technologies (JS, Wordpress, Oracle, SQL Server, MySQL, Java, C#, C, C++, VB, ...)
- Participated in developing many medium-to-large scale projects for governmental and private solutions
- Worked across fields like (*Logistics, Metering, Astronomy, Medical, Workflow, Managerial, Financial, Educational*)

# What I’m doing?

- I’m currently working as .NET Full Stack Engineer
- Recording videos for YouTube channel
- Participating in Open-Source Community on GitHub
- Implementing ideas that may hit my mind

# What is the channel content?

- Channel focuses on Programming Content
- Content is mostly 10 to 15 minutes lectures to make it easy for busy developers to catch it up.
- Content is uploaded at fixed schedules.
- Content and updates are declared on LinkedIn profile:

https://www.linkedin.com/in/emadsaber2013/

# What is our mission & vision?

## HSSD

**H**ighly **S**killed **S**enior **D**evelopers

- Our mission is to create high quality, highly detailed content that helps create **highly skilled senior developers**
- Our Vision is that by 5-10 years the Arab Software Market will be high competitor to US & Europe market

# How topics are selected?

- Topics are targeting the experience gaps in the market
- Beginner courses can be easily found everywhere
- Highly detailed courses can be hardly found, so, we create it here.

# How is content being prepared?

- Content is depending on references in each topic
- **We don’t depend on articles or posts to make a content**

Don’t give your time to one who don’t respect it.

# How can you go beyond your expectations?

**The person who you are today should be better than yesterday’s one.**

- You can go further by asking about your problems/gaps and work on them immediately.
- Declaring the problem is the first step of healing.
- Read from documentation/references basically, articles come next.
- Stackoverflow can help you solve an issue, but doesn’t give you a real knowledge.
- If reading books is hard, start it now, it will be harder for you in the future.

# How can you help us?

- الدعاء لي ولوالدي
- Share our content to reach more people
- Give us feedback on videos
- Subscribe: https://www.youtube.com/@emadsaber_89
